Review

*for the project of the educational master's program "Economics"
of the Kharkiv National Automobile and Highway University (Ukraine)*

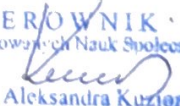

The analysis of the project of the educational master's program "Economics" presented on the website of the Kharkiv National Automobile and Highway University (<https://www.khadi.kharkov.ua/education/katalog-osvitnikh-program/051-ekonomika/>) is the basis for the formation of the following conclusions:

– the educational program is high-quality and modern, corresponds to the mainstreams of the development of economic science, such as management of the risks, people, innovations, information and projects;

– the educational program provides for scientific activity of students through mastering the methodology of scientific research and carrying out their own scientific research, including during the writing of a master's thesis. This approach contributes not only to the high-quality training of a professional economist, but also motivates graduates to further enroll in doctoral studies to obtain the degree of Doctor of Philosophy in Economics.

A unique feature of the educational master's program "Economics" of the Kharkiv National Automobile and Highway University is that 1/3 of the distance (electronic) courses of the mandatory educational components were developed/improved by lecturers within the framework of the international project "Establishment of German-Ukrainian university network for securing successful education in Ukrainian universities in time of war and crisis" with the support of the German Academic Exchange Service (DAAD) and the funding program "Ukraine digital: Ensuring academic success in times of crisis, 2022". In my opinion, this is a significant feature should be reflected in the description of the educational program.

Review

for the project of the educational master's program "Entrepreneurship, trade and exchange activity" of the Kharkiv National Automobile and Highway University (Ukraine)

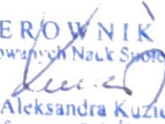

The analysis of the project of the educational master's program "Entrepreneurship, trade and exchange activity" presented on the website of the Kharkiv National Automobile and Highway University (<https://www.khadi.kharkov.ua/education/katalog-osvitnikh-program/076-pidprijemnictvo-ta-torgivlja/>) is the basis for the formation of the following conclusions:

– the educational program is high-quality and modern, corresponds to the mainstreams of the development of business, such as venture entrepreneurship, international trade, quality management;

– the educational program provides for scientific activity of students through mastering the methodology of scientific research and carrying out their own scientific research, including during the writing of a master's thesis.

A unique feature of the educational master's program "Entrepreneurship, trade and exchange activity" of the Kharkiv National Automobile and Highway University is that 50% of the distance (electronic) courses of the mandatory educational components were developed/improved by lecturers within the framework of the international project "Establishment of German-Ukrainian university network for securing successful education in Ukrainian universities in time of war and crisis" with the support of the German Academic Exchange Service (DAAD) and the funding program "Ukraine digital: Ensuring academic success in times of crisis, 2022". In my opinion, this is a significant feature should be reflected in the description of the educational program.
