

REVIEW
on the educational and professional "Management of organizations and
logistics" program in 073 "Management"
specialty of 07 Management and administration
field of knowledge
of the Kharkiv National Automobile and Highway University
(first (bachelor's) level of higher education)

With increasing instability and uncertainty of the external environment, there is an increasing need for training specialists who can apply innovative approaches and methods of management and logistics, who can solve complex problems of transport and logistics enterprises development, their efficiency and competitiveness. The presented "Management of organizations and logistics" educational-professional program (EPP) contains general information, purpose, characteristics of the educational program, basic and optional educational components, program competencies, matrix of correspondence of program competencies to components of educational program and matrix of providing program learning outcomes. The disciplines of the curriculum provided by EPP form the whole set of integrated and professional competencies which are necessary for modern logistics managers. The included in the curriculum disciplines and its quality fully meet the modern requirements for the preparation of bachelors in organizational management and logistics.

The peer-reviewed educational and professional program, prepared by the Department of Management of Kharkiv National Automobile and Highway University, provides comprehensive and targeted approaches to training a qualified bachelor of management of organizations and logistics, it is forward-looking for the labor market, and its graduates may be of particular interest and value for employers in the field of automobile transport. Thus, the educational and professional "Management of Organizations and Logistics" program with 073 Management specialty is relevant and in line of global trends in the field of automobile transport, therefore can be recommended for implementation in the educational process of Kharkiv National Automobile and Highway University to train specialists of first (bachelor) level of higher education.
